

Research the countries your food comes from

Using your country of origin & the food miles calculator worksheet, find out which countries the food we eat is grown in and using a world map, identify the countries, plot them with a small flag, write the countries down and draw a picture of the related product

How many different countries are there?

Colour in the map/ Research what the county's flag looks like.? locate the UK and some of the countries where the food we eat comes from.

An example is on the next page

Research the countries your food comes from

Map of UK
